DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Houghton et al (6,429,730).

Houghton et al discloses a voltage regulator having a output terminal to provide an output voltage regulated according to a reference voltage; a N type first transistor (60) having a first terminal coupled to a positive terminal of a voltage source, a second terminal coupled to a first bias, and a third terminal directly coupled to the output terminal (out) of the voltage regulator; and a P type second transistor (54) having a first terminal coupled to the third terminal of the first transistor, a second terminal coupled to a second bias, and a third terminal coupled to a negative terminal of the voltage source (see figure 4).

Response to Arguments

3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

4. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
